

UK Housing Market — Power BI Dashboard

Interactive Power BI dashboard visualising UK housing market trends (2023-2025)

across Greater London, Greater Manchester, West Midlands, and West Yorkshire.

Built on top of the [SQL analysis](<https://github.com/DanPrangate/uk-housing-sql-analysis>)

in the companion repo.

Dashboard Includes

- Regional average price trends over time
- Price breakdown by property type and county
- New-build vs. established property price comparison
- Top 10 fastest-growing districts by % price change

Key Insight

While Greater London prices cooled slightly, regional cities across Greater Manchester, West Yorkshire, and the West Midlands saw the strongest growth

—

none of the top 10 growth districts were in London.
